

**Ergonomically Safe Collection System**

US Patent No. 6,820,843

Canada Patent No. 2,482,663

*Introducing:*

## RAILPAX **TrashRax**

### **SECURITY Trash System**

**Newly introduced receptacle  
from Sibley Laboratories  
with Homeland Security in mind.**

**All the benefits of our ergonomically safe trash collection system now available  
with TrashRax Security Clear refill bags.**

**Made with our own SecuraClear crystal clear resins.**

- **TrashRax** provides a user-friendly, view-thru receptacle when used with approved PortaSafe refill bags.
- **TrashRax** are available at a fraction of the cost when compared to other view-thru receptacle requiring acrylic side panels.
- **TrashRax** provide a new crystal clear panel every time the bag is changed - no expensive acrylic panels to replace
- **TrashRax** has combined an ergonomically safe to use trash collection system, with a clear focus on Homeland Security. How will potentially dangerous items places in a trash container be identified, when both the container and the can are opaque?
- No other trash receptacle offers as much unobstructed clear viewing area as the **TrashRax** PortaSafe system from Sibley Labs..

Notice in the picture above how clear you can read the letters on the magazine and make out the plush toy puppy.
